Associate of Arts

Business Administration

## Technical Skills

JavaScript, React, HTML, CSS, Node, Express, MongoDB, Axios, Navigo, Restful APIs, API testing with insomnia, Visual Studio Code, Markdown, Git, GitHub, UI/UX, Jira, Agile, SPA's, CRUD Operations, Deploying to Netlify and Heroku.

## Projects

### - Savvy Coders

Utilized agile and scrum methodologies. I was the product owner for my team. I set up our sprints, assigned tasks and assisted the team with reaching our sprint goals.

I built a full stack SPA for basketball enthusiasts. Technologies used include Javascript, CSS, HTML, MongoDB, Node.js, Express.js and APIs.

### - React Projects

—Created a full stack CRUD app called “What 2 Eat”. The app allows you to create and manipulate a restaurant database. Technologies used include: React, Node.js, Express.js, MySQL and Styled-components for styling.

View app: <https://what-2-eat-tracker.netlify.app/> View code: <https://github.com/Vann-Calhoun/what-2-eat-client>

—Created a real estate lead gen/landing page using Next.js (React framework). Gained a good understanding of how Next.js works and the basics of SEO (search engine optimization).
